1 Introduction to Leawo DVD Ripper

Leawo DVD Ripper is designed for you to rip and convert DVD to various video formats, and extract audio content from source DVD content and save as various audio formats. Far more than a DVD to video/audio converter, Leawo DVD Ripper can be treated as a DVD player, a DVD editor and a 3D movie creator. Instant media previewing is available with the help of the internal DVD player. The built-in DVD editor allows you to trim video length, add video watermark, crop video size, and adjust video effect. 3D movie creation from source 2D DVD content is also feasible. Download and install Leawo DVD Ripper on your computer, and then kick off the program to enter the home page as shown below.

1.1 Limitations of Trial Version & Method of Getting Registered Version

The trial version of Leawo DVD Ripper allows you to have a free trial before you purchase the registered version. It should be noted that the trial version is limited in features and functions. Here limitations of trial version are presented together with the method of getting the registered version.

1.1.1 Limitations of Trial Version

The trial version allows you to convert only the first five-minute DVD content, and you cannot gain the free support from Leawo Software during the usage of the trial version.

1.1.2 Method of Getting Registered Version

To enjoy the unlimited features of Leawo DVD Ripper, you need to purchase a registration code for getting the registered version. Click the key icon  at the top right to enter the activation center, where you need to click “purchase” button  to get the registration code.

After receiving registration code, you are required to enter the code into the box and click  to activate the related functions.

1.2 Home Page Settings

1.2.1 Feedback

Click  button at the top menu bar to send your precious feedback to Leawo Software for improving the program.

1.2.2 Settings

Click the gear icon  to pop up detailed settings panel.

1.2.2.1 General Settings

Under “General” button, you can freely choose a language for the UI from 11 preset languages: English, German, Japanese, Simplified Chinese, Russian, Hungarian, Armenian, Spanish, French, Portuguese and Dutch.

1.2.2.2 Conversion Settings

Under “Conversion” button, you can choose whether or not to prioritize native codec, to enable streaming MP4 video, and to enable DVD navigator, and at the same time, you can set the maximum tasks for running.

1.2.2.3 Performance Settings

Under “Performance” button, you can freely set CPU core.

1.2.2.4 Connection Settings

Under “Connection” button, you are allowed to set internet proxy in detail, and to set the frequency of automatically checking program update.

1.2.2.5 Others Settings

Under “Others” button, you can set the location of external subtitle, default encoding, screenshot image format, and the output directory for saving screenshot images.

1.2.3 Help Center

Click the question mark  to enter the Help Center, on which you can visit the product page of Leawo Prof. Media by clicking “Home” , learn how to properly use Leawo Prof. Media by clicking “Tutorial” , report problems you encountered during the usage of Leawo Prof. Media by clicking “Bug Report” , click  to check program update, click  and  to purchase and register the program, click  to write user review of the program, click  to get support from Leawo Software team, and click  to check the version number of Leawo Prof. Media and other information.

1.2.4 Program Window Size Adjustment

Click  to minimize the program window; click  to maximum the size of the program window; click  to close the program window.

2 Convert DVD

Kick off Leawo DVD Ripper to enter the home page, where you need to click “Convert” button on the sub-menu or “DVD Ripper” button in the middle to enter the converting interface.

2.1 Step 1. Import Source DVD Files into Program

On the converting interface, click “Add Blu-ray/DVD” to import DVD disc, folder, or ISO image file. Alternatively, you can directly drag and drop source DVD files into the converting panel.

Once DVD content is selected, you will be provided three options for you to import DVD file(s): Full Movie, Main Movie and Custom Mode. Full Movie allows you to import all titles, and Main Movie only imports the longest title by default while you can freely choose titles for importing under Custom Mode. Choose a mode and click “OK” button to start importing source DVD files.

Once source files are imported, you can preview source files via the inbuilt media player, select subtitles and audio tracks, edit source files, etc.

2.2 Step 2. Choose Output Profile

There is a drop-down box named “MP4 Video” by default next to “Add Photo” button. Click the box

to pop up a small panel, where you need to click “Change” to enter the “Profile” panel. You can choose either video/audio format or mobile device as output profile under “Format” or “Device” group. Various video/audio formats and device models are available for selection, like 4K MP4, 4K MKV, HD MP4, HD AVI, MOV, iPhone 6s, iPad Air, etc. You can also make good use of the quick searching box on the left to fast locate your desired profile.

2.3 Step 3. Set Video and Audio Parameters (Optional)

Leawo DVD Ripper allows you to change the video and audio parameters of selected profile like Video Codec, Bit Rate, Resolution, Frame Rate, Aspect Ratio, Audio Codec, Channel, Sample Rate, etc. You could enter the Profile Settings panel by clicking the same drop-down box and then clicking

“Edit” option instead of “Change” option. After setting parameters, you could click

“Save to Custom” option  to add customized profile to “Custom” group.

2.4 Step 4. Set Output Directory

After profile settings, you will be returned to the converting panel, on which you need to click the green “Convert” button to set output directory for saving the output files. Once  is clicked, a small side bar will pop up, and you need to set a directory under “Save to” box for containing the output files.

2.5 Step 5. Start Conversion Process

Click the “Convert” button  at the bottom of sidebar to start conversion process. During the conversion process, you could click “Cancel” button to call off the process.

3 Edit Source DVD

With the built-in DVD editor, Leawo DVD Ripper allows you to edit source media files by trimming, cropping, watermarking, adjusting video effects and applying 3D effect. Add source media files,

right click a loaded media file and select "Edit" option, or click the "Edit" icon  at the end of a file, to enter the video editing panel.

3.1 Trim Video Length

Under "Trim" section, you can directly drag the slide bar to trim video length, or manually input values in "Start Time" and "End Time" box. The clip length can be viewed instantly. Reset it or click "OK" to confirm it.

3.2 Add Video Watermark

Switch to “Watermark” section, enable the Watermark button to green, and then you are allowed to add either Text or Image as video watermark. Watermark Transparency, Left Margin, Top Margin, Image Size are adjustable. Check "Apply to all" to add watermark to all videos. Press "OK" to confirm it.

3.3 Crop Video Size

Under "Crop" button, directly drag the dot frame to crop video, or select Letter/Pan/Custom/Full/16:9/4:3 in "Zoom", and adjust values in "Left"/"Top"/"Size" to get your desired video size. Press "OK" to confirm it.

3.4 Adjust Video Effect

Go to "Effect" section, directly drag the slides of "Brightness", "Contrast", "Saturation", and "VolumeZoom(%)" for special video effect. Check "Apply to all" to apply the effect settings to any of your loaded files. Press "OK" to confirm it.

3.5 Convert 2D to 3D

On the video editing panel, open the "3D" tab and then slide the "3D Mode" to green. You could then choose a 3D effect to apply to the final video file. There are in total 6 different 3D movie effects available for you to choose from: Red/Cyan, Red/Green, Red/Blue, Blue/Yellow, Interleaved, and Side by Side. Select one according to the 3D glasses you are using to enjoy 3D videos. For more vivid 3D effect, you could even directly drag the slide or set values in 3D Depth to adjust 3D depth. Tick "Apply to all" to apply selected 3D movie effect to all video files.
